FINISHED DOSAGE FORM (FDF) PRODUCT DEFECT ALERT

Reporting Entity:	MetroHealth Multi-Speciality Hospital	Complaint Date:	2026-09-11
Product Name:	Ciprofloxacin Tablets 500mg	Complaint Type:	Tablet Friability and Capping Defect
Product Strength/Grade:	USP 500mg (Film-Coated)	Batch/Lot Number:	CIP260814C
Manufacturing Date:	2026-08-14	Expiry Date:	2029-08-13
Quantity Affected:	250.0	Quantity Unit:	blister strips (2500 tablets)

Clinical Occurrence & Quality Failure Description

During inpatient drug administration in the Intensive Coronary Care Unit (ICCU) and General Medical Ward, clinical nurses observed widespread physical disintegration of tablets upon expelling from blister packaging. Over 250 blister strips (2,500 tablets total) across carton boxes from lot CIP260814C exhibited severe tablet capping, lamination, and excessive friability with crumbling of the core beneath the thin film coating. In-house hospital pharmacy laboratory friability re-check showed weight loss of 2.8% (USP tolerance < 1.0%). All dispensing has been halted immediately and the entire batch has been placed under quarantine.

Action Requested from Manufacturer

- Immediate replacement consignment of compliant Ciprofloxacin 500mg tablets to prevent therapy disruption.
- Technical root cause report on compression pressure and binder ratio for batch CIP260814C.
- Nationwide hospital advisory / recall notification if friability failure extends across the commercial batch.
